

# ARTEM TITOV

## REACT FRONTEND ENGINEER

### ABOUT

Hey! In parallel with the main work in another area, I studied html and css. After half a year and a couple of completed projects for friends, I started freelancing. At the moment, I decided to make development the main activity. I use **React**, **Redux** libraries and learn **TypeScript**. I am looking for a job with an interesting project and a strong, responsive team, I easily find a common language with people, I am constantly learning and developing.

### PREVIOUS EXPERIENCE

#### Website Developer

Freelancer (July 2019 - August 2021)

- I developed landing pages, business card sites, transferred the layout to wordpress, in general, the tasks were very different

#### Frontend engineer

Pet project (2 weeks) [source](#) / [demo](#)

- Developed a catalog store for a clothing brand using React, Redux. It was necessary to implement a product catalog, an admin panel with the ability to change the content on the site, add products.

### TECH STAK

JavaScript ES6+   React   Redux Toolkit   React Router Dom   Scss   BEM   Git
